getting started with implants

Two leaders join hands to bring the most comprehensive program on Implant and Esthetic Dentistry

Starting August 2007

Dear Colleague,

The SDM College of Dental Sciences and Hospital, Dharwad is a premier institute for dental education in India, and is the only Dental college to be accredited with a Five Star Status from NAAC-UGC.

The Dept. of Oral Implantology at SDMCDS is the pioneer institute for Implant training in India, which started way back in 1993. The Dept. had distinguished visitors including Prof. P.I. Branemark, Prof. P. Worthington, Prof. Grafelmann, Dr. Manfred Lang to mention a few. The Dept. runs a very successful postgraduate programme for students studying their masters in the fields of Prosthodontics, Periodontics and Oral & Maxillofacial Surgery.

To impart training to a vast number of dental surgeons and to make dental implant therapy as the ideal treatment for any missing tooth, the Dept. is organising this Certificate course in Implantology in association with Nobel Biocare.

This is designed so as to teach the participants the basics of the science and art of implantology alongwith hands-on sessions and placement of implants on patients.

As the registrations are restricted to a small number, we request you to register at the earliest and make best use of this unique opportunity.

We look forward to your active and whole hearted support in making this course a grand success.

With best wishes,

Dr. Srinath Thakur

Certificate course in Implantology
